06/2017 – 04/2018 | SSC

Sri Chaitanya High School

Tenali

CGPA-9.2

PROJECTS

02/2024 - 5/2024 • Skin lesion classification

at University

Ham10000 Dataset

HAM10000 Dataset: This dataset includes a total of 10,015 thermoscopic images. This dataset is known as one of the most complex imaging databases for multiclass skin lesion classification. Seven different types of skin lesions are included, namely AKIEC, BCC, BKL, DF, NV, MEL, and VASC.

- My role is to ensure the accuracy and reliability of the developed models and my responsibilities are testing the models against various scenarios and edge cases, identifying and addressing issues related to model performance. Technologies used are pre-processing hair removal, data augmentation models like Resnet, Inceptionv3, and MoblieNetv2.

06/2023 - 10/2023 • Weather Forecasting Application

at University

Mobile Application

This project is about forecasting weather for up to 5 days with the help of API. This application is helpful to see if the weather is good for some prior planned occasions. This application is developed in Android Studio. My role as a front-end developer improves my skills in user interaction.

- My responsibilities are Ensuring a smooth and intuitive user experience for accessing weather information. Optimizing navigation and information flow to provide a clear understanding of the weather data. technologies like HTML and CSS

10/2022 - 12/2022 •

at University

Fitness Application

Mobile Application

This project is about managing a person's fitness. This app contains exercises in addition to Diet and tips. Every Exercise has a time limit with tutorial gifs. User can track their data anywhere by logging in to their specified account with the help of Firebase(cloud storage) and also every exercise is stored into firebase daily.

- My role is to create a visually appealing and user-friendly interface for a front-end developer. Myresponsibilities are to Implement interactive features and components to enhance user engagement. Technologies used are Firebase, HTML and CSS

SKILLS

C Language

- Knowledge on datatypes
- Knowledge of Control statements and looping statements.

Core Java

- Excellent grip on Control statements and looping statements.
- Good Knowledge of OOPS concepts.

My SQL

- Basics of SQL statements.
- Good knowledge of Joins.

Front-end web Designing

- Working knowledge of HTML, CSS, and JavaScript
- Ability to create intuitive, user-friendly interfaces, and layouts.

CERTIFICATES

- Software Project Management by NPTEL

PERSONAL DETAILS

Date of Birth- 16/12/2001

Address-Guntur, Andhra Pradesh 522001
